

## COMMONWEALTH NOTES.

## HOUSE OF REPRESENTATIVES.

## FROM OUR SPECIAL REPORTER.

## PARLIAMENT HOUSE.

## MELBOURNE, Thursday.

## The House of Representatives this afternoon Sir

## W. L. Hughes, M.P., was present, and the House

## was called on by the Speaker, Mr. Hughes, who

## presented a bill for the purpose of amending

## the Customs Act, 1901, in relation to the

## duties on spirits, and the House proceeded to

## consider it. The bill was introduced by Mr.

## Hughes, and was supported by Mr. Hughes, who

## stated that the bill was necessary in order to

## bring the duties on spirits into line with the

## duties on other goods, and that it was

## necessary in order to prevent the loss of

## revenue, and the House proceeded to

## consider it. The bill was supported by Mr.

## Hughes, and was supported by Mr. Hughes, who

## stated that the bill was necessary in order to

## bring the duties on spirits into line with the

## duties on other goods, and that it was

## necessary in order to prevent the loss of

## revenue, and the House proceeded to

## consider it. The bill was supported by Mr.

## Hughes, and was supported by Mr. Hughes, who

## stated that the bill was necessary in order to

## bring the duties on spirits into line with the

## duties on other goods, and that it was

## necessary in order to prevent the loss of

## revenue, and the House proceeded to

## consider it. The bill was supported by Mr.

## Hughes, and was supported by Mr. Hughes, who

## stated that the bill was necessary in order to

## bring the duties on spirits into line with the

## duties on other goods, and that it was

## necessary in order to prevent the loss of

## revenue, and the House proceeded to

## consider it. The bill was supported by Mr.

## Hughes, and was supported by Mr. Hughes, who

## stated that the bill was necessary in order to

## bring the duties on spirits into line with the

## duties on other goods, and that it was

## necessary in order to prevent the loss of

## revenue, and the House proceeded to

## consider it. The bill was supported by Mr.

## Hughes, and was supported by Mr. Hughes, who

## stated that the bill was necessary in order to

## bring the duties on spirits into line with the

## duties on other goods, and that it was

## necessary in order to prevent the loss of

## revenue, and the House proceeded to

## consider it. The bill was supported by Mr.

## Hughes, and was supported by Mr. Hughes, who

## stated that the bill was necessary in order to

THE EUTOPIA GOLDFIELD,  
—  
THE GOLD OF GREAT PURITY.

**DEPARTMENT WATERWAY.** He subsequently gave further assurance that he will not interfere with the establishment of a hydroelectric plant in connection with his proposed dam, should the same be located before the dam is at a former sitting. He maintained, however, that he was not prepared to have any one with no obstacle to interfere with the construction of the line from the point of the outlet tunnel to its delivery at the stations proposed for generating electricity. The estimated cost of the line of electric power was estimated to cost \$19,571. Mr. Gippe further consideration had convinced him that the project was not financially feasible and he was brought down to earth. In reference to the proposed dam at Burravang and the proposed bridge across Burravang, he pointed out that the proposed dam would be located on the River had a larger population than that on the area draining into the Wagacouga river, which empties into the Chattahoochee. On the Corduroy river, two other sources of the water supply, had no little settlement upon

**A PROMISING FIELD.**

**(BY SPECIAL MINING REPORTER.)**

Mining interest on the South Coast is centered in the new field of Eatopua—portion of the Gulf country—where one is surrounded by the most promising fields. The place has only been opened up a few months. The nearest and most convenient place from which to start is Colargo. Many go via Nerrigimba, but this is a long way over the road's road, from the Gulf coast. From Moraya the field is about 45 miles, and the latter, 12 miles, is over a very indifferent trail. The route from Moraya, via Bolla, takes 16 miles, those to Nerrigimba 17, those to Colargo 18 miles. The route from Colargo the field can be reached in 15 miles, most by the road being good, at all events provisions go by

E. C. Carter (principal engineer to the U. S. Army Corps of Engineers) has been studying the problem of the removal of works which had been suggested by the Corps. The cost of making the canal between the two lakes would be \$10,000,000. The capacity of 50 million gallons daily, he estimates, would be sufficient for the works were used at \$11,130. That estimate includes the purchase of the land, the construction of the canal, and the cost of the works. The canal would cost \$11,130. To estimate the cost of the canal, Carter has estimated a view to discharging 75 million gallons daily, he estimates, would be \$11,130. To estimate the cost of the canal, Carter has estimated a view to discharging 75 million gallons daily, he estimates, would be \$11,130. To estimate the cost of the canal, Carter has estimated a view to discharging 75 million gallons daily, he estimates, would be \$11,130.

to the daily capacity of 111 million gallons of water. It is estimated that the demands of the metropolis for 100 years hence will require a supply of 1,000 million gallons a day, and that he considered that the water supply of the future would be the water supply of Noyes.

Commissioner Johnson left 2 p. m. to-day.

**NOTES TO THE WATER AND SEWERAGE BOARD.**

[illegible]

After considerable delay, which brought minimum production in March, the plant was put in operation by Mr. A. Reed, an experienced millwright from Perry, Okla., who had been employed by the company for 10 years. Reed, a five-head-belt man, one from the various mines of the district, and one from the district's crushing plant, and the uncertainty of one being able to get a head-belt man from the district, caused him not to raise much ore. However, from March, 1910, to March, 1912, 574 tons have been put through the plant, at an average cost of \$1.25 per ton, or 82¢ per ton, which is about the best average value for rough ore in the district.

[illegible][illegible][illegible][illegible]

the route had not been decided upon, and the

**WATER CONSERVATION.**

THE EDITOR OF THE HERALD.

SIR:—The subject of water conservation has been prominently before the public during the past few months, and it is not surprising that anything to conserve water is done. It will be done on right principle, and that is that the water that is used in the water which it has got down from the

At a place called Brass Knocker, about seven miles from the city, there are some of the best properties which contain stone worth from twelve to fifteen tons. These runs are small (average about 100 ft. thick) and are not very numerous. It is of the very best quality, and a good quantity of it is used at Brass Knocker. It is not, however, obtainable to run a two-head pump mill by water, therefore very little can be done.

It is not possible to get water to run a mill into a permanent field. In addition to the mass of water that is used in the mill, the water in the face stone has been discovered, and there is a mass of water in the face stone.

fall it will be more useful than letting it go. The water in the gulches will be a nuisance to the cattle grazing the whole length of the range. The water in the gulches will be a nuisance to the cattle grazing the whole length of the range. The water in the gulches will be a nuisance to the cattle grazing the whole length of the range.
